3 Anti-Masking Alarm

Anti-masking function is complying with EN50131-2-4 grade3 within AM-Hi sensitivity.

Mounting position of the detector shall be 0.5m away from lamp of forklift and fluorescent lamp to avoid masking false alarm.

4 Anti-Cloaking Alarm

Anti-cloaking and Anti-crawling is complying with High sensitivity.

5 Connect to Control Panel

Note: The resistor needs to be connected to the end of detector.

1 None Resistor Wiring

2 Single EOL Wiring

3 Double EOL Wiring

4 Triple EOL Wiring

Note: There is no red cable in the detector, which needs wiring by yourself.

LED Jumper	LED Input	LED Operation
OFF	High (9 to 16 V)	Enabled
OFF	Low (0 V)	Disabled
ON	Low (0 V) or high(9 to 16 V)	Disabled

Connect the LED input terminal to power voltage (9-16 V) allows the LED to be remotely enabled. To use this feature, the LED jumper must be in OFF status.

The detector supports PIR operation only when it is in GM mode, the default is microwave disabled, LED off, and AM status is according to configuration (if AM is on, the LED for AM alarm is on). When PIR is triggered, the microwave will be active and operation as normal. If PIR is not triggered within one minute, the microwave will disable again.

1. After powering on, the detector enters walk test mode for 10 minutes.
2. When LED is disabled, use hand close to the surface of the detector, blocking 1 s and removing 1 s consecutively for 5 times, the detector will enter walk test mode for 3 minutes, and the red light flashes for 3 s.
